

Low Income Among Persons With A Disability in Canada

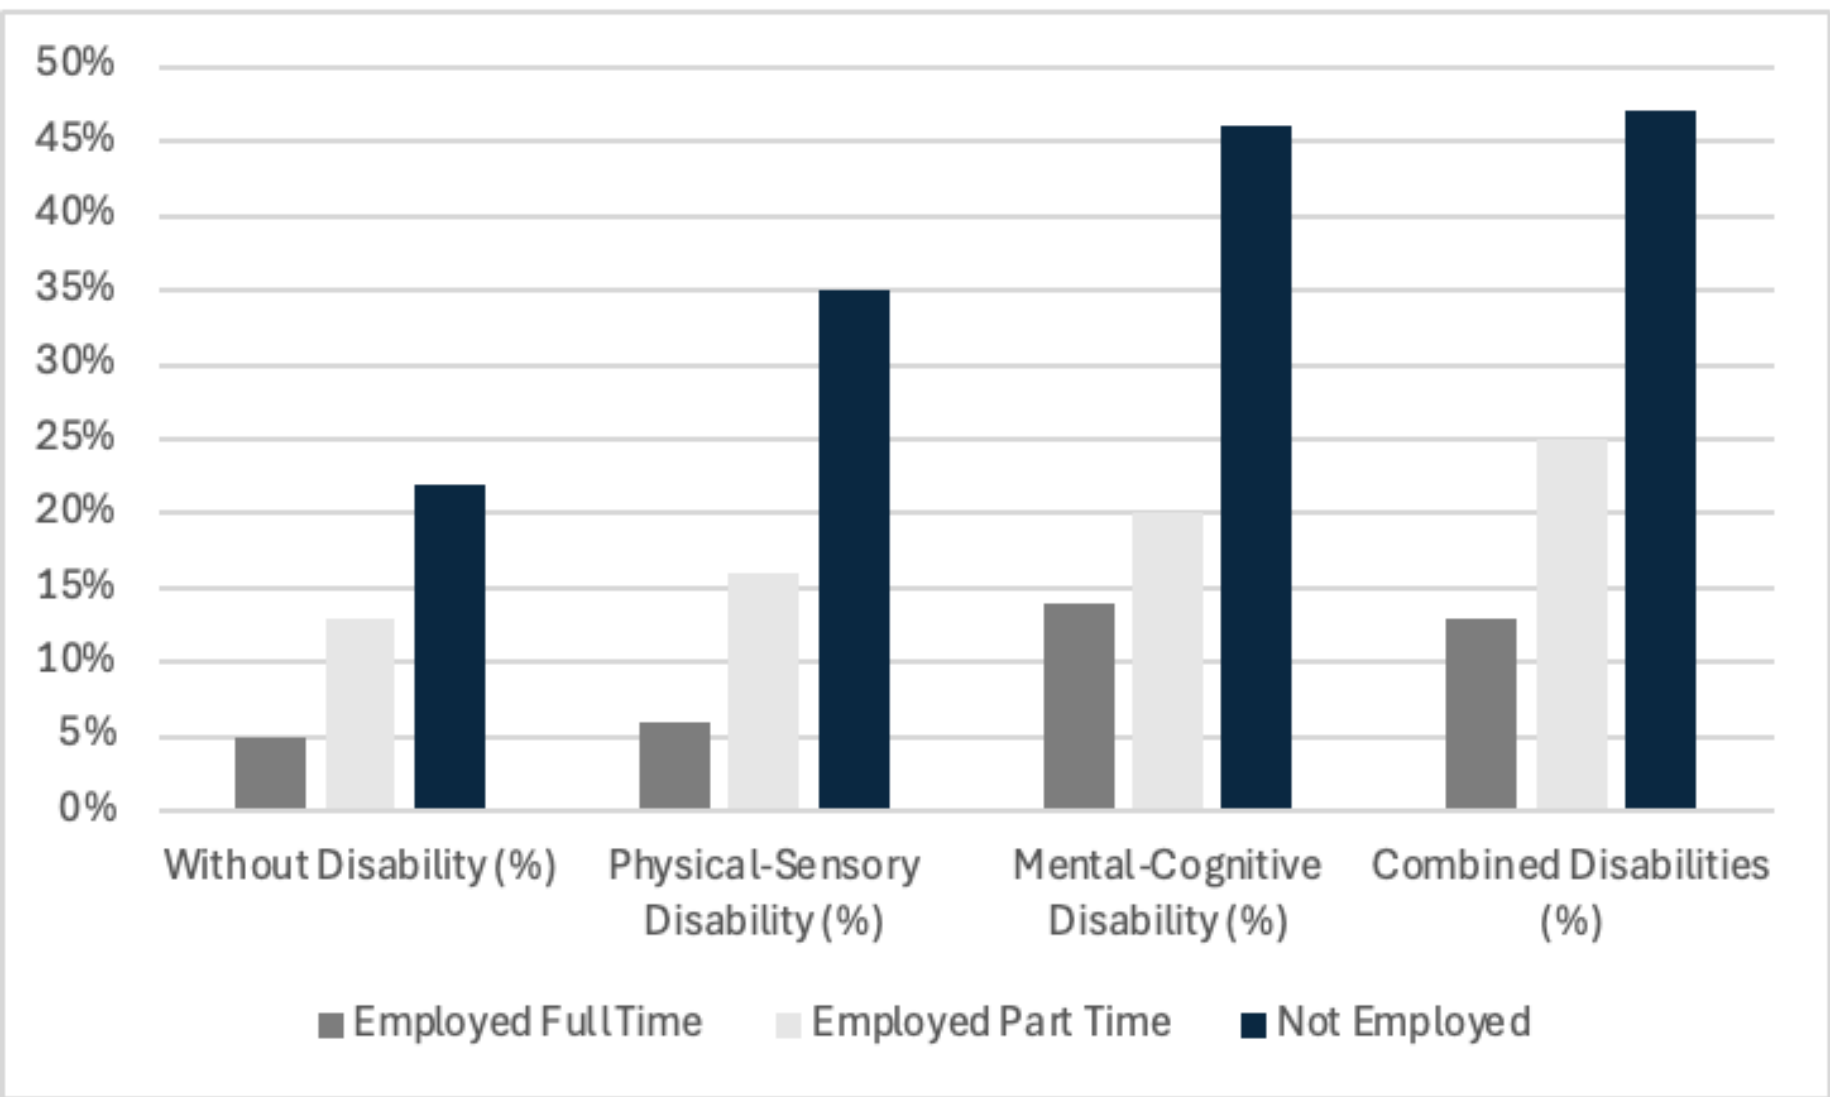

01 Low-Income Rates by Disability Severity

This graph could break down how the severity of the disability affects the likelihood of being in low income, a bar chart is shown for easy comparison.

- The X-axis is Disability severity (Mild or Severe, categorized by disability type),
- The Y-axis is Low-income rate (percentage),
- The graph clearly illustrate that the severity of a disability strongly correlates with higher rates of low income.

02 Low-Income Rates by Employment Status and Disability Type

- **X-Axis:** Employment status (Full-time, Part-time, Not employed)
- **Y-Axis** Low-income rate (percentage)

- This graph emphasizes on how unemployment or part-time employment dramatically increases the low-income risk, especially for those with disabilities.
